AXLE REGENERATION

***REGENERATED
REAR AXLES***

WWW.ANTALEX.PL

Over 300 000 manufactured regenerated axles, about **23 000 pieces** of axle cores on our square, **7 000 m²** production area, **15 years** of experience, over **70 employees** – we are largest company in Europe which specialize in production of regenerated rear axles for Peugeot, Citroen and Renault.

380 000+
REGENERATED AXLES

EXPERIENCE

Our company since 2003 specializes in the production of regenerated rear axles of Peugeot, Citroen and Renault cars.

The production and sale of this type of suspension is the only profile of our activity. Narrow specialization, the right direction of the company's development, high motivation in action, trained employees all caused that throughout all these years we have gained extensive experience in the field of our operations and we are leaders in the regeneration of the rear axles on the European market.

AVAILABILITY

Thanks to the huge number of axles that we have in turn and also due to the production capabilities, our axles are always available on the shelf.

We always have in stock both the most popular and unusual axles. Even very large wholesale orders can be realized in a short time. We sell axles for both old, used and without the need to return old axles.

HIGH QUALITY PARTS

For the production of axles, we use original parts from such companies as SNR, Koyo, Hutchinson, Kleber or the highest quality substitutes from renowned manufacturers.

We have been using proven parts for many years so we are not afraid to take responsibility for our products as evidenced by providing a 2-year warranty for axles and in fact 99% of our axles will withstand several years of use.

SERVICE QUALITY

We provide customer service at the highest level.

We are happy to answer any questions, we will help in choosing the right beam, we will reply to an e-mail and solve all problems related to the purchase of the beam. Our goal and motto is customer satisfaction, so all our activities are aimed at achieving this goal.

PARTNERS ACROSS EUROPE

ANTALEX cooperates with many wholesalers and distributors of auto parts throughout Europe.

Our company supplies and sells the rear axles under our brand ANTALÉX by different car parts distribution networks (for example: AD Baltic - subsidiary of AD International, ELIT Poland, RHIAG group belonging to LKQ Corporation). ANTALÉX rear axles are thus sold under the own brands of distributors and major brand names known throughout Europe. The confidence of our partners is proof of the high quality of our rear axles.

2 YEARS
WARRANTY

WARRANTY

Thanks to the vast experience, the use of the highest quality parts and multi-stage quality control during the regeneration and installation of axles, we grant a 2-year warranty on our products, with our axles withstanding several years of service.

COMPETITIVE PRICE

Our company is systematically developing, we regenerate more and more axles, we buy more and more parts, we invest in new machines and devices.

Thanks to this, we can optimize the production process so that the unit costs per one axle are as small as possible. All this allows us to systematically lower the prices of finished products while maintaining a constant quality.

SPEED OF SERVICE

We have a number of solutions to streamline the entire axles purchase procedure e.g. for wholesale customers we have designed and made by us special pallet transport system, we cooperate only with the best carriers thanks to which deliveries are always on time.

WHOLESALE OFFER

Our main direction of the company's development is the production and wholesale of regenerated axles.

Wholesale prices start with the purchase of a minimum of 40 axles. ANTALLEX cooperates with many wholesalers and distributors of auto parts throughout Europe. Our company supplies and sells the rear axles under our brand ANTALLEX by different car parts distribution networks (for example: AD Baltic - subsidiary of AD International, ELIT Poland, RHIAG group belonging to LKQ Corporation).

ANTALLEX rear axles are thus sold under the own brands of distributors and major brand names known throughout Europe. The confidence of our partners is proof of the high quality of our rear axles. We are looking for new wholesale contractors who wanted to sell our products.

We offer the possibility of buying axles both for exchange and without having to return the cores. We have a large system of buying cores of rear axles and we have a big stock. So, we can guarantee to our customers the regular deliveries rear axles without the need to return the old materials (also like new products) but at much more attractive prices.

OUR COMPANY

We offer:

- attractive prices when you buy a minimum of 40 axles once
- high quality of products confirmed by a 2-year warranty
- short delivery time
- help in the implementation of new products
- efficient logistics of both deliveries and returns of cores
- suitable pallets for transporting axles
- the possibility of packing axles and labeling the customer
